

Worldpay and TAS together to simplify and enhance the competitiveness of pagoPA Payments

A strategic partnership to offer merchants a turnkey solution for integrating pagoPA payments into their applications, thereby expanding opportunities for citizens and businesses.

Milan – February, 27 2025 Worldpay, a global leader in payment solutions with a presence in 146 countries and the processing of over 50 billion transactions annually, and TAS, an Italian ICT company specializing in payment systems and transaction processing, announce a new partnership to simplify and broaden access to digital payments to the Public Administration.

The integration of Worldpay's acquiring and processing solutions with TAS's PayTAS platform enables merchants, app developers, and payment service operators to join the pagoPA network and easily offer the collection and payment functionalities of pagoPA, without the need to develop complex infrastructures. Already adopted by numerous banks, payment institutions, and many prominent public entities and creditors, PayTAS is a platform that streamlines the collection process and digitizes payments to the Public Administration and other entities participating in the pagoPA system. It facilitates connection to this system, both as a Technology Partner and as a Payment Service Provider (PSP).

"The collaboration with Worldpay allows us to extend the value of PayTAS and offer, even to third-party operators, a turnkey solution for pagoPA payments that can be easily integrated on online channels, physical networks, mobile devices, and state-of-the-art physical POS systems. With Worldpay, we are also working on introducing innovative payment processes and tools," said Stefano Macchi, Technical Sales Representative at TAS.

"Thanks to this integration, anyone wishing to offer payments within the pagoPA network will be able to do so simply and without technical complexities, thereby expanding the available channels for citizens and businesses while ensuring competitive rates".

"Working with TAS and pagoPA is an important milestone, as it makes Worldpay part of the change and innovation in digital payments to the Public Administration. The advanced security and speed of transactions ensure a smooth and satisfying payment experience, affirming the cutting edge of our payment solutions."— Phil Brown, Country Manager Italy and Malta, Worldpay.

TAS is a leading technology company, providing advanced solutions for cards, payment systems, capital markets and extended enterprise. Our leading-edge software allows both banks and new players in the payments space to deliver and manage frictionless, real-time B2C, B2B, B2G transactions, integrating with and leveraging the latest technologies.
